DISHWASHER SAFETY

Your safety and the safety of others are very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol.

This symbol alerts you to potential hazards that can kill or hurt you and others.

All safety messages will follow the safety alert symbol and either the word "DANGER" or "WARNING."

These words mean:

⚠ DANGER

You can be killed or seriously injured if you don't immediately follow instructions.

⚠ WARNING

You can be killed or seriously injured if you don't follow instructions.

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

⚠ WARNING

Tip Over Hazard

Do not use dishwasher until completely installed.

Do not push down on open door.

Doing so can result in serious injury or cuts.

You Need to:

- Slowly open dishwasher door while someone grasps the rear of the dishwasher. Remove shipping materials and drain hose. Close dishwasher door until latched.

NOTE: Each dishwasher is tested at the factory and may contain some residual water in the tub as a result of the test.

- Observe all governing codes and ordinances.
- Install this dishwasher as specified in these instructions.
- Installation should be performed by a qualified service technician.
- The dishwasher must be installed to meet all electrical and plumbing national and local codes and ordinances.

Care shall be exercised when the appliance is installed or removed, to reduce the likelihood of damage to the power cord.

WARNING: To reduce the risk of electric shock, fire, or injury to persons, the installer must ensure that the dishwasher is completely enclosed at the time of installation.

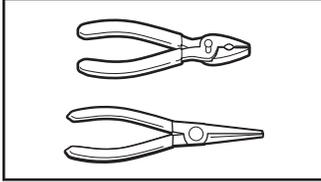

INSTALLATION REQUIREMENTS

TOOLS AND PARTS

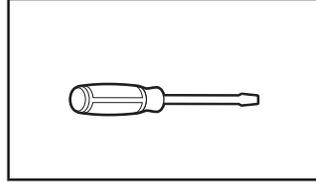

Gather the recommended tools and parts before starting installation. Read and follow the instructions provided with the tools listed here.

All Installations

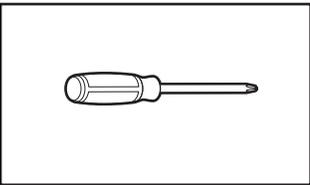

Tools Needed:

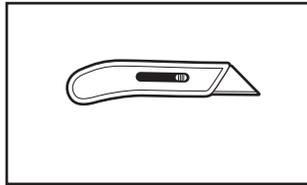

Pliers

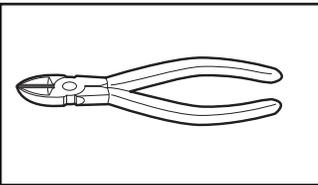

Flat-blade screwdriver

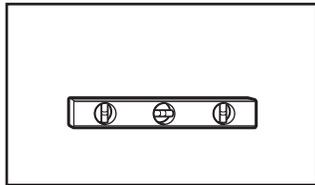

Phillips screwdriver

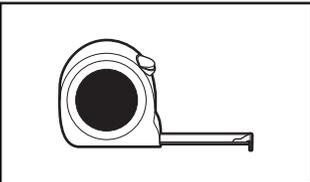

Utility knife

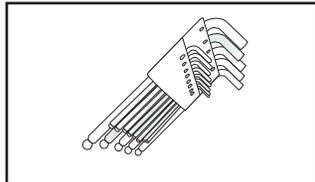

Nipper

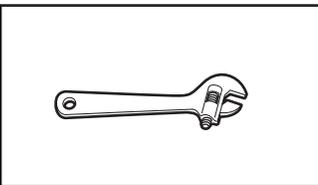

Small level

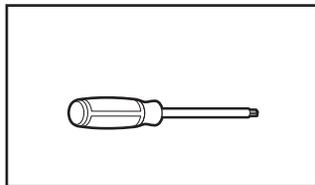

Measuring tape or ruler

Hex L-wrenches

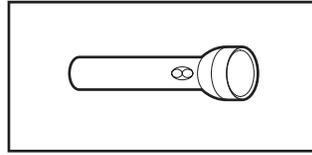

10" adjustable wrench that opens to 1⁷/₈" (29 mm)

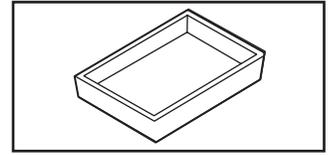

Torx[®]† T20[®] screwdriver

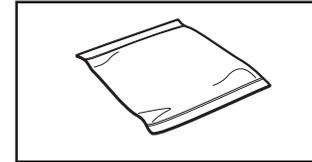

Other Useful Items You May Need:

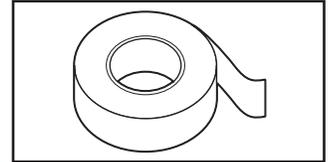

Flashlight

Shallow pan

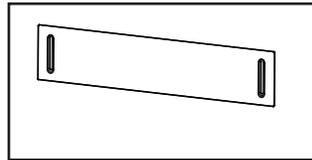

Bath towel

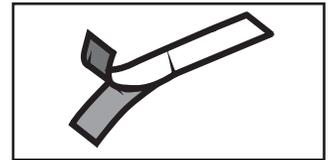

Masking, electrical, or duct tape

Parts Supplied:

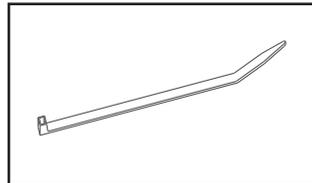

Provided with the dishwasher. Check when you unbox the dishwasher.

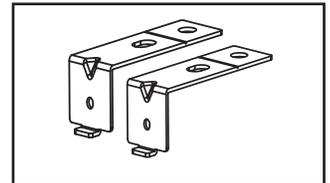

Kick plate

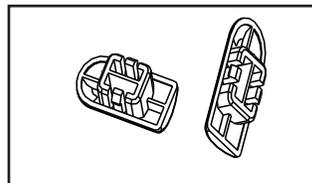

Moisture barrier strip

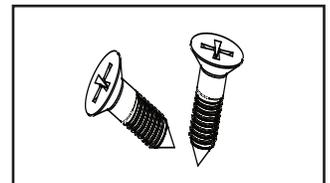

Cable tie (for drain hose)

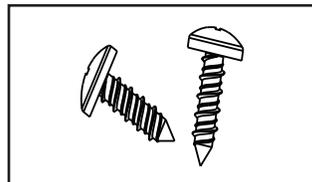

Undercounter mounting brackets (2)

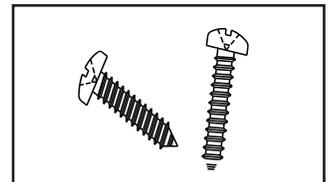

Adjustment cap (2)

ST4 x 14 (2) (for installation bracket)

ST3.9 x 9 (2) (for installation bracket)

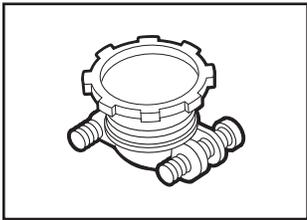

ST3.9 x 13 (2) (for kick plate)

Make sure all parts are included in the literature package. If parts are not included, call us at our toll-free number or visit our website listed in the User Guide.

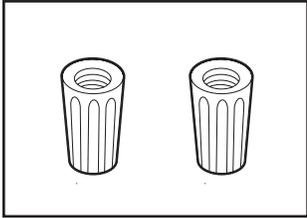

†[®]TORX, T15, and T20 are registered trademarks of Acument Intellectual Properties, LLC.

Other Parts Needed (not provided):

Household Wiring (Metallic) Strain Relief
to fit 7/8" (22 mm) hole
(required to properly secure
household wiring to the
dishwasher terminal box)
(Whirlpool Part
Number 4396672)

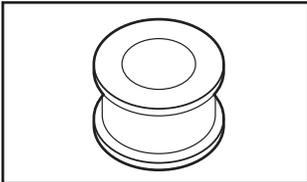

NOTE: Use only UL Listed/
CSA Approved part.

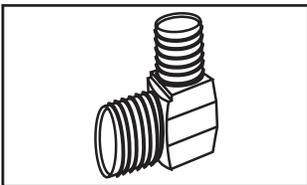

Twist-On Wire Connectors

NOTES:

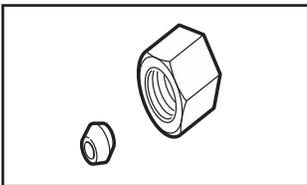

- Confirm proper size for connecting your gauge of household wiring to the 16-gauge wiring in the dishwasher.
- Use only UL Listed/CSA Approved parts.

TEFLON^{®†} Tape or Sealing Compound

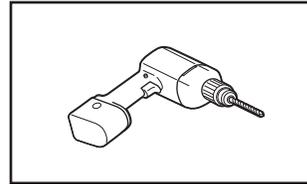

90° elbow

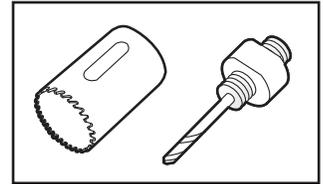

Tube fittings
(for copper tubing)

Call us at our toll-free number, visit our website listed in the User Guide for part numbers above, or see local electrical/plumbing supply retailer for equivalent.

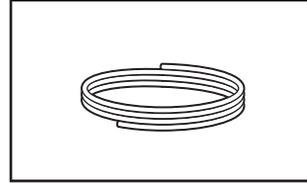

Cordless drill

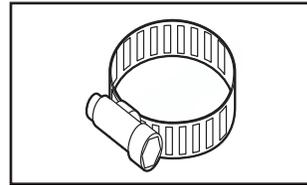

1/2", 3/4", and 1 1/2" hole saw bits

Additional Parts Needed (not provided):

Copper Tubing (3/8" O.D. suggested) or Flexible Braided Water Supply Line Kit (Whirlpool Part Number W10278635RP). Kit includes braided hose and 3/8" compression x 3/4" hose fitting.

Hose Clamps 1 1/2" - 2" (38-50 mm) (3 maximum)

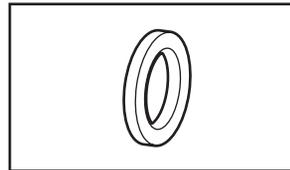

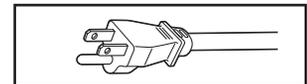

Call us at our toll-free number, visit our website listed in the User Guide for part numbers above, or see local plumbing supply retailer for equivalent.

NOTE: If using a flexible braided hose, replace inlet hose after 5 years to reduce the risk of hose failure. Record hose installation or replacement dates on the hose for future reference.

For Direct Wire

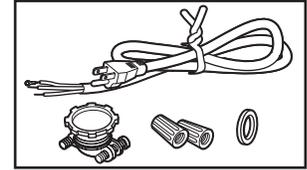

For Power Cord

Cabinet Grommet

For 1 1/2" (38 mm) hole in cabinet. (Whirlpool Part Number 302797)

NOTE: Required for metal cabinets

Power Cord Kit

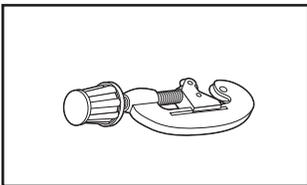

Kit typically includes power cord, metallic strain relief, grommet, and twist-on wire connectors. (Whirlpool Part Number 4317824)

Call us at our toll-free number, visit our website listed in the User Guide for part numbers above, or see local electrical supply retailer for equivalent.

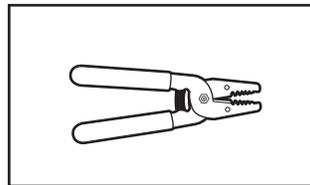

First-Time Installations

Check local codes. Check existing electrical supply. See the "Electrical Requirements" section. It is recommended that electrical connections be made by a licensed electrical installer.

Additional Tools Needed:

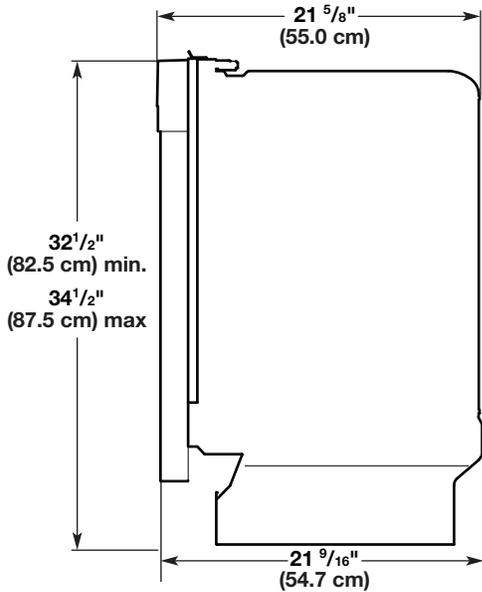

Small tubing cutter

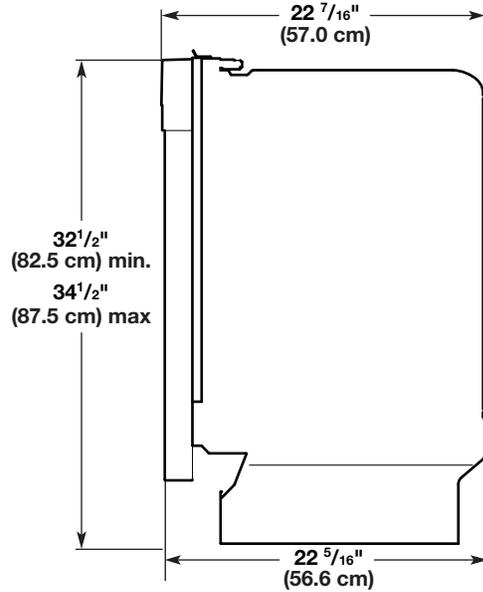

Wire stripper

†TEFLON is a registered trademark of Chemours.

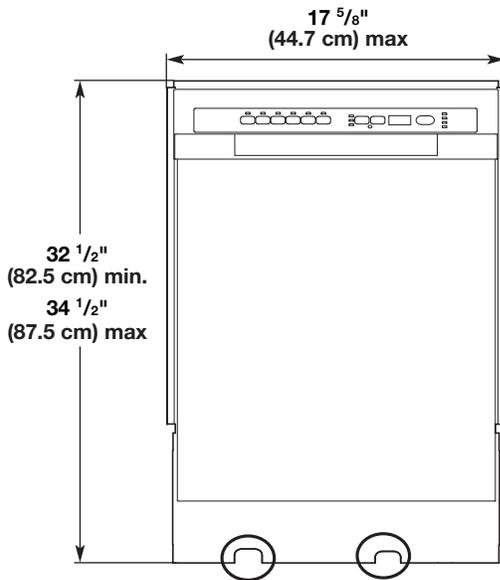

18" PRODUCT AND CABINET OPENING DIMENSIONS:

Side View 18" Custom Wood Panel

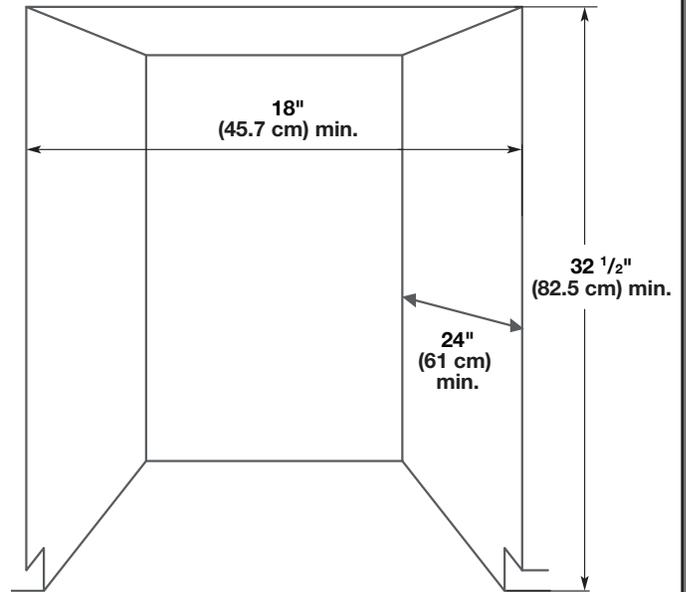

Side View 18" Metal Door Panel

Front View

NOTE: Route the water supply line and power cable through the channels provided under the dishwasher (circled above).

Cutout Dimensions

Underside of countertop to floor

The enclosure must be at least 18" (45.7 cm) wide, 24" (61 cm) deep, and 32½" (82.5 cm) high.

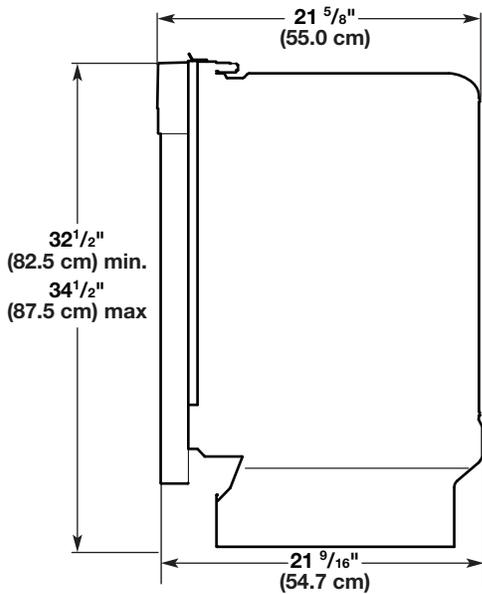

For the front door of the dishwasher to be flush with the leading edge of the counter top, the counter top must be at least 24" (61 cm) deep.

This dishwasher is designed to be enclosed on the top and on both sides by a standard residential kitchen cabinet unit.

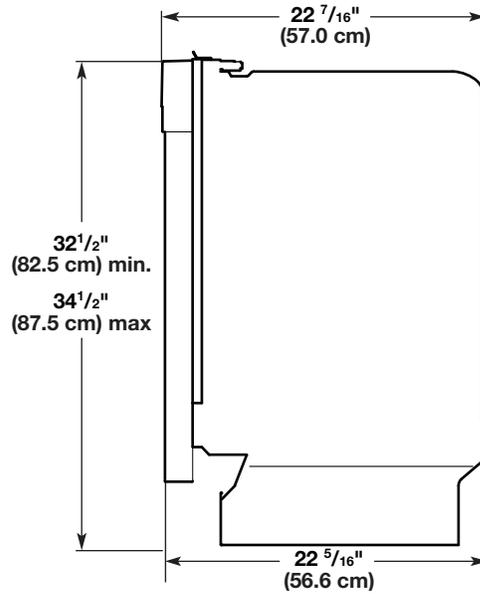

The installation enclosure must be clean and free of any obstructions.

NOTE: ADA installation, 32½" (82.5 cm) beneath 34" (86.4 cm) high countertops may be accomplished by adjusting the toekick and leveling legs.

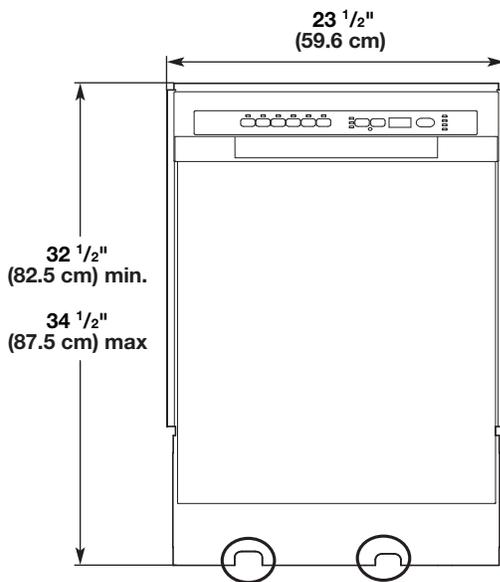

24" PRODUCT AND CABINET OPENING DIMENSIONS:

Side View 24" Custom Wood Panel

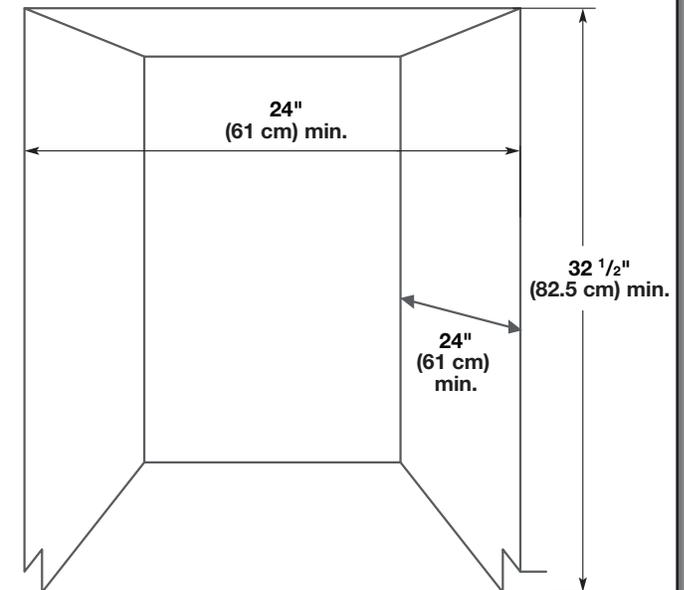

Side View 24" Metal Door Panel

Front View

NOTE: Route the water supply line and power cable through the channels provided under the dishwasher (circled above).

Cutout Dimensions

Underside of countertop to floor

The enclosure must be at least 24" (61 cm) wide, 24" (61 cm) deep, and 32½" (82.5 cm) high.

For the front door of the dishwasher to be flush with the leading edge of the counter top, the counter top must be at least 24" (61 cm) deep.

This dishwasher is designed to be enclosed on the top and on both sides by a standard residential kitchen cabinet unit. The installation enclosure must be clean and free of any obstructions.

NOTE: ADA installation, 32½" (82.5 cm) beneath 34" (86.4 cm) high countertops may be accomplished by adjusting the toe kick and leveling legs.

LOCATION REQUIREMENTS

Do not run drain lines, water lines or electrical wiring where they can interfere with or contact dishwasher motors or legs.

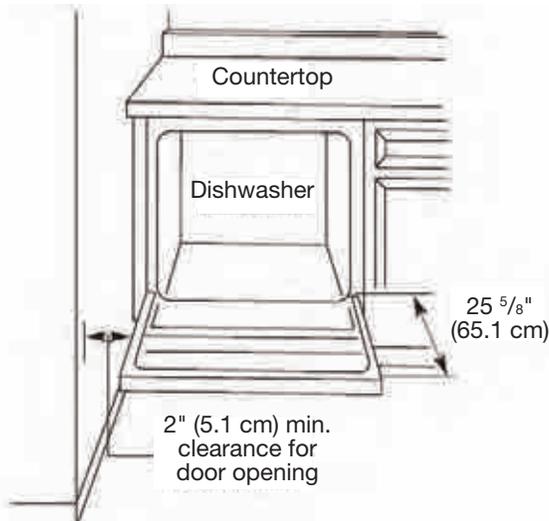

The dishwasher installation location must provide clearance between motors and flooring. Motors should not touch the floor.

Do not install dishwasher over carpeted flooring.

Protect dishwasher and the water lines leading to dishwasher against freezing. Damage from freezing is not covered by the warranty.

Check dishwasher installation location. The location must provide:

- Easy access to water, electricity, and drain.
- Convenient access for loading and unloading dishes. Corner locations require a 2" (5 cm) minimum clearance between the side of the dishwasher door and the wall or cabinet.

- Full enclosure on both sides, back, and top.
- Square opening for proper operation and appearance.
- Cabinet front perpendicular to floor.
- Level floor. (If floor at front of opening is not level with floor at rear of opening, shims may be needed to level dishwasher.)

NOTE: To prevent shifting during dishwasher operation, shims must be securely attached to the floor.

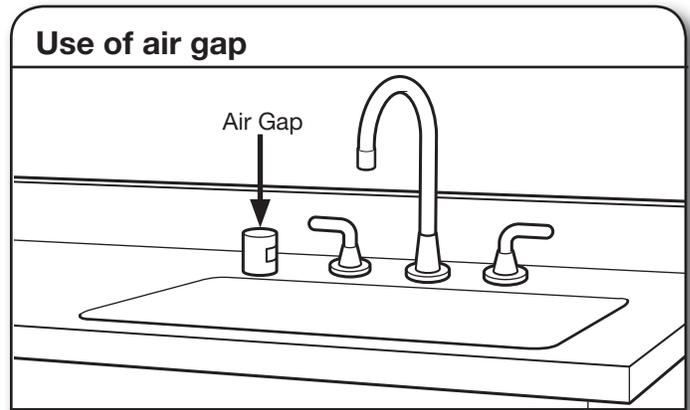

If dishwasher will be left unused for a period of time or in a location where it may be subject to freezing, have it winterized by authorized service personnel.

Make sure pipes, wires, and drain hose are within the area shown in the "Cutout dimensions" section.

Helpful Tip: If the floor in the dishwasher opening is uneven, (example: tile flooring only partway into opening) you will need to take special care in measuring dimensions and in leveling dishwasher.

DRAIN REQUIREMENTS

- Use the new drain hose supplied with your dishwasher. If this is not long enough, use a new drain hose with a maximum length of 9.8 ft (3 m) from the sink that meets all current AHAM/IAPMO test standards, is resistant to heat and detergent.
- Connect drain hose to waste tee or disposer inlet above the drain trap in the house plumbing and 20" (50.8 cm) minimum above the floor. It is recommended that the drain hose be either looped up and securely fastened to the underside of the counter, or be connected to an air gap.
- Use an air gap if the drain hose is connected to house plumbing lower than 18" (45.7 cm) above the floor.

- Use 1/2" (1.3 cm) minimum I.D. drain line fittings.

WATER SUPPLY REQUIREMENTS

- This dishwasher has a water heating feature and also requires a connection to a hot water supply line.
- A hot water line with 20-120 psi (138-862 kPa) water pressure.
- 120°F (49°C) water at dishwasher.
- 3/8" (.95 cm) O.D. copper tubing with compression fitting or flexible stainless steel braided fill line (1/2" minimum plastic tubing is not recommended).
- A 90° elbow with 3/8" (.95 cm) N.P.T. external pipe threads on one end.

NOTE: Do not solder within 6" (15.2 cm) from fill valve.

ELECTRICAL REQUIREMENTS

Contact a qualified electrician.

Assure that the electrical installation is adequate and in conformance with all national and local codes and ordinances.

You must have:

- 120 volt, 60 Hz, AC only, 15 or 20 amp., fused electrical supply.
- Wiring must be 2 wire with ground.

We recommend:

- A time-delay fuse or circuit breaker.
- A separate circuit.

If direct wiring dishwasher:

- Use flexible, armored or non-metallic sheathed, copper wire with grounding wire that meets the wiring requirements for your home and local codes and ordinances.

If connecting dishwasher with a power supply cord:

- Use Power Supply Cord Kit (Part No. 4317824) marked for use with dishwashers. Kit contents include:
 - UL listed 16 gauge 3 wire power supply cord with 3 prong grounded plug.
 - Neer C-500 7/8" (2.2 cm) strain relief.
 - 3 wire connectors.
 - Part No. 302797 grommet.

Follow the kit instructions for installing the power supply cord.

- Power supply cord must plug into a mating three prong, grounded outlet, located in the cabinet next to the dishwasher opening. Outlet must meet all local codes and ordinances.

INSTALLATION INSTRUCTIONS

⚠ WARNING

Electrical Shock Hazard

Disconnect electrical power at the fuse box or circuit breaker box before installing dishwasher.

Failure to do so can result in death or electrical shock.

1. Disconnect power

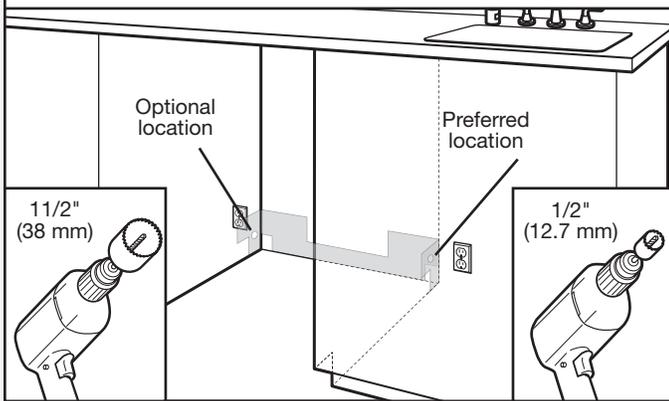

Disconnect electrical power at the fuse box or circuit breaker box before installing dishwasher.

2. Shut off water supply

Shut off the water supply to the dishwasher.

PREPARE CABINET OPENING— NEW UTILITIES

3. Drill hole locations—new construction

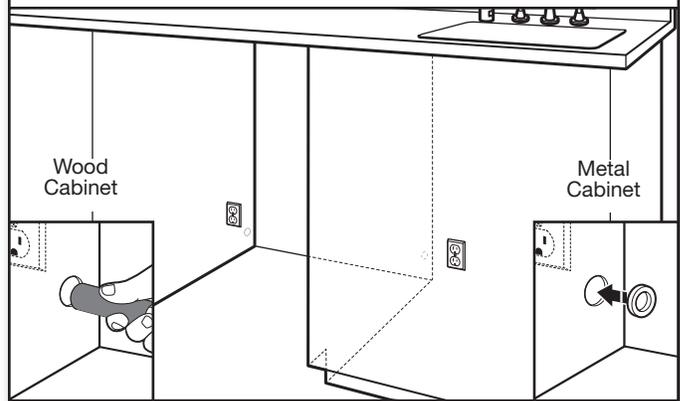

NOTE: Refer to the “Product and Cabinet Opening Dimensions” section for the correct hole placement and dimensions of the shaded area.

Drill a 1 1/2" (38 mm) drain hose hole in the side or rear of cabinet, depending on location of drain hose routing and drain hose connection location.

Drill a 1/2" (12.7 mm) water supply hose hole in the side or rear of cabinet, depending on location of water supply routing and connection location.

Drill a 1 1/2" (38 mm) electrical conduit hole in the right-hand side or rear of cabinet.

4. Sand holes smooth

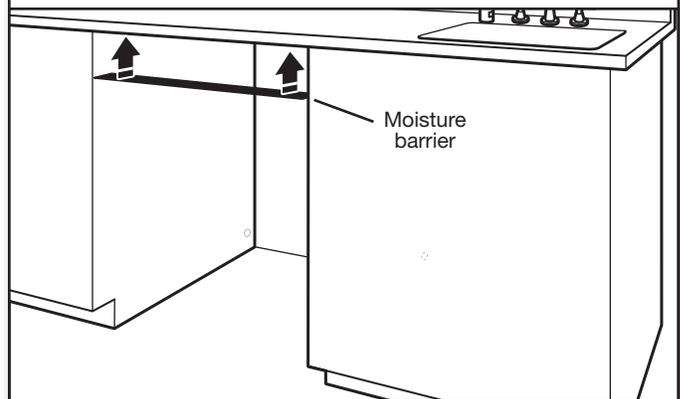

Wood cabinet: Sand the hole until smooth.

Metal cabinet: Cover edges of hole with grommet included with power cord kit. See the “Tools and Parts” section part details.

Helpful Tip: Wiring the dishwasher will be easier if you route the cable into the cabinet opening from the right-hand side.

MOISTURE BARRIER - RECOMMENDED FOR WOOD COUNTERTOPS

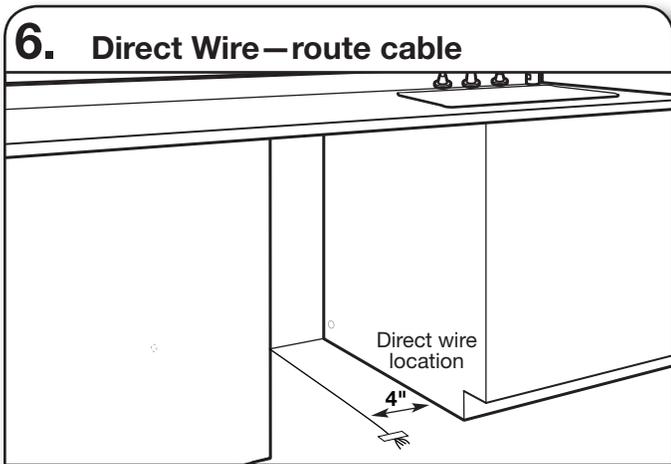

5. Moisture barrier/wood shims

Make sure the area under the cabinet is clean and dry for installation of the moisture barrier. Remove the backing of the moisture barrier, and apply to underside of the countertop along the front edge of the counter.

DIRECT WIRE ROUTING

6. Direct Wire—route cable

If direct wire, route the cable 4" (10.2 cm) from the right side of the cabinet to align with channel in the bottom of the dishwasher. Tape cable to the floor in the area shown. This will help secure the cable in place when the dishwasher is moved into the cabinet opening during direct wire connection.

PREPARE DISHWASHER

⚠ WARNING

Tip Over Hazard

Do not use dishwasher until completely installed.
Do not push down on open door.
Doing so can result in serious injury or cuts.

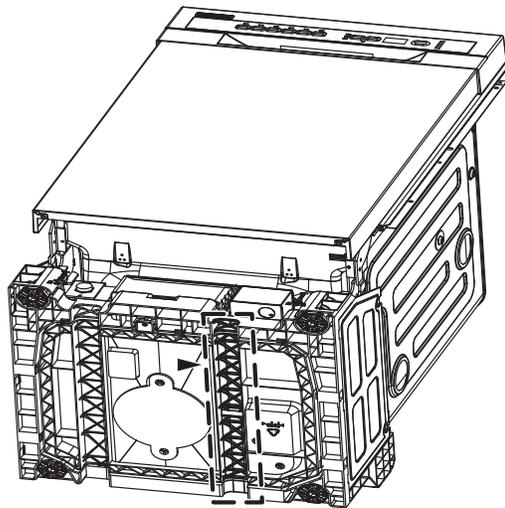

⚠ WARNING

Excessive Weight Hazard

Use two or more people to move and install dishwasher.

Failure to do so can result in back or other injury.

7. Put the dishwasher on its back

Dishwasher bottom

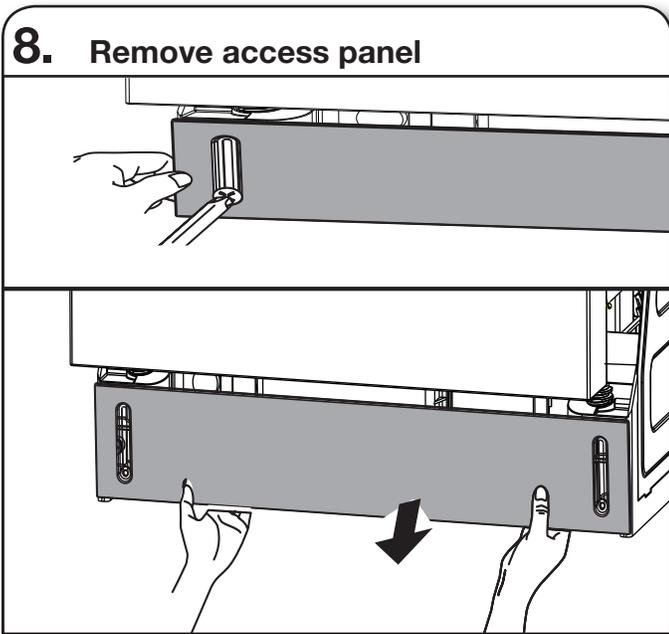

Helpful Tip: Place cardboard under dishwasher until installed in cabinet opening to avoid damaging floor covering.

Using two or more people, grasp sides of dishwasher door frame, and place the dishwasher on its back.

Do not use the door panel as a worktable without first covering it with a towel to avoid scratching the door panel.

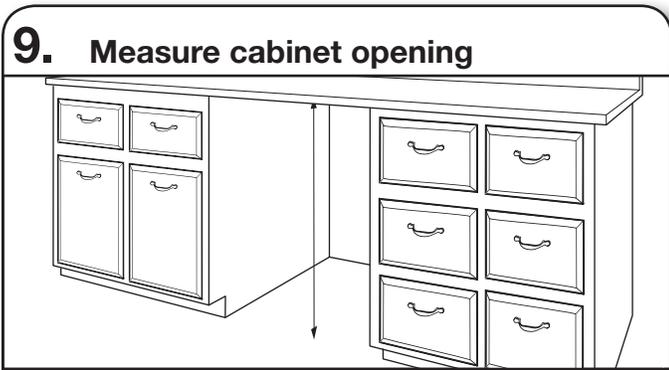

REMOVE ACCESS PANEL

8. Remove access panel

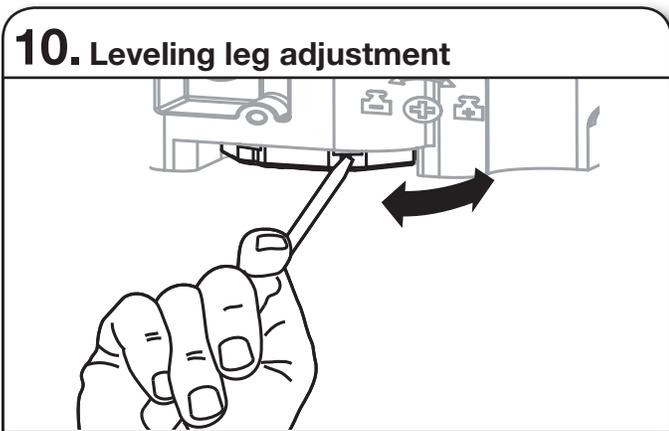

Using a 1/4" nut driver or Phillips screwdriver, remove the two screws attaching access panel to dishwasher.

9. Measure cabinet opening

Measure the height of cabinet opening from the underside of the countertop to the floor where dishwasher will be installed. Be sure to measure the lowest point on the underside of the countertop and the highest point on the floor.

10. Leveling leg adjustment

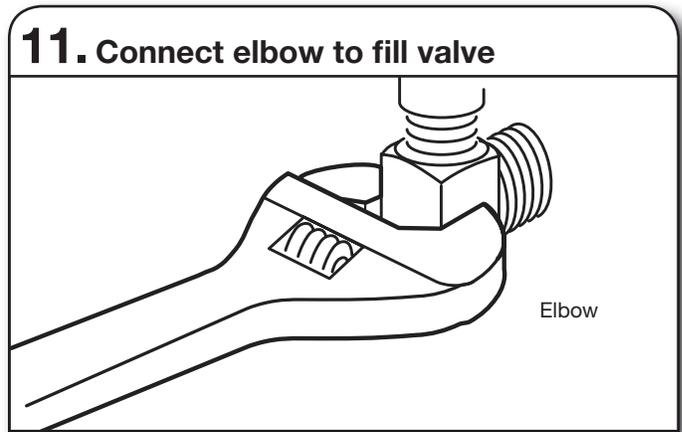

Extend leveling legs out from the dishwasher base, 1/4" less than the shortest opening height measured in cabinet opening.

Turn leg counter clockwise to raise the dishwasher or clockwise to lower the dishwasher.

CONNECT ELBOW TO VALVE

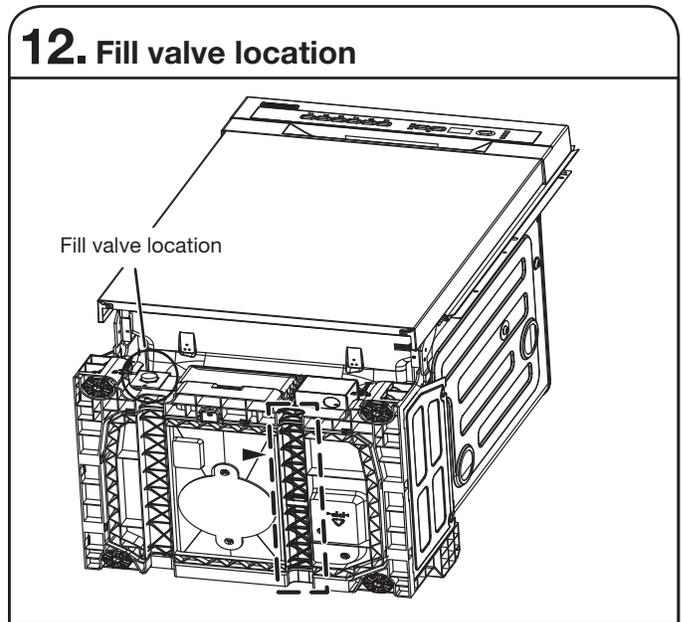

11. Connect elbow to fill valve

Apply thread seal tape to 90° elbow fitting and connect fitting to fill valve.

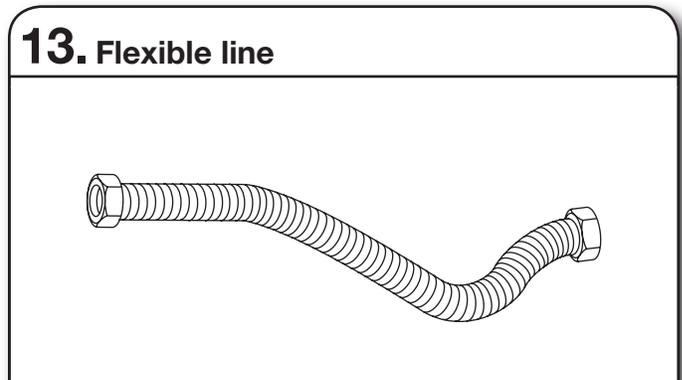

Tighten elbow until snug, and be sure that it faces toward channel in bottom of base.

12. Fill valve location

CONNECT FILL HOSE TO ELBOW

13. Flexible line

Flexible braided line: Confirm the flexible braided line is long enough.

Attach flexible line to elbow then route hose out the bottom left channel under the dishwasher. Secure in channel with tape or wire ties.

POWER CORD CONNECTION

⚠ WARNING

Electrical Shock Hazard

Electrically ground dishwasher.

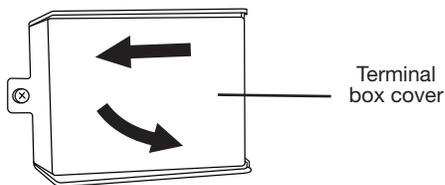

Connect ground wire to green ground connector in terminal box.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

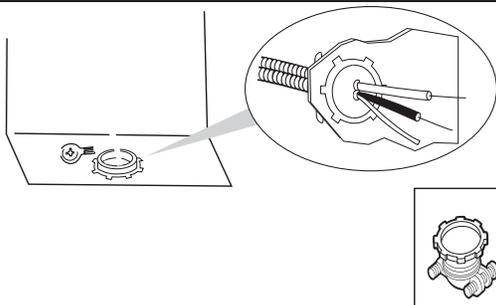

NOTE: If removing a previous dishwasher with a power cord, you will need to transfer the power cord to the new dishwasher.

14. Remove terminal box cover

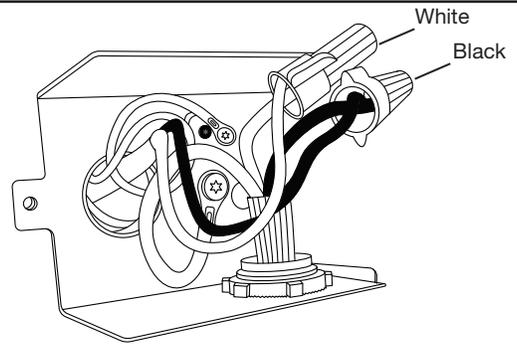

Remove the screw holding the terminal box cover. Remove the cover by sliding it up and lifting the hooks out of the slot. Keep the cover for later use.

15. Install strain relief

Install a UL Listed/CSA Approved metallic strain relief. Make sure screw heads are facing up when tightening conduit nut. Strain relief is provided with the power cord kit. See the "Tools and Parts" section for part details and ordering information.

16. Power cord—route cord into terminal box

Select UL Listed/CSA Approved twist-on wire connectors of the proper size. See the "Tools and Parts" section for part details. Connect wires, black-to-black and white-to-white, using the twist-on wire connectors.

NOTE: Do not pre-twist stranded wire. Twist on wire connector. Gently tug on wires to be sure both are secured.

Route cord so that it does not touch dishwasher motor or lower part of dishwasher tub. Pull cord through strain relief in terminal box.

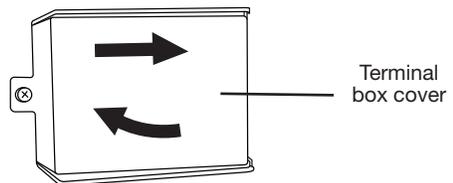

NOTE: A maximum of two power cord supply conductors (12 AWG largest size) plus one grounding conductor are permitted in the terminal box.

Remove the ground connector screw on the raised floor inside the box and place it through the ring terminal of the green ground wire of power cord. Reattach and tighten the ground connector screw to the raised floor of the box. Tighten strain relief screws to secure cord.

Wiring configuration

| Power supply wire: | | Terminal box wire: |
|--------------------|----|--------------------|
| white | ←→ | white |
| black | ←→ | black |
| ground wire | ←→ | ground connector |

17. Power cord—reinstall terminal box cover and wires

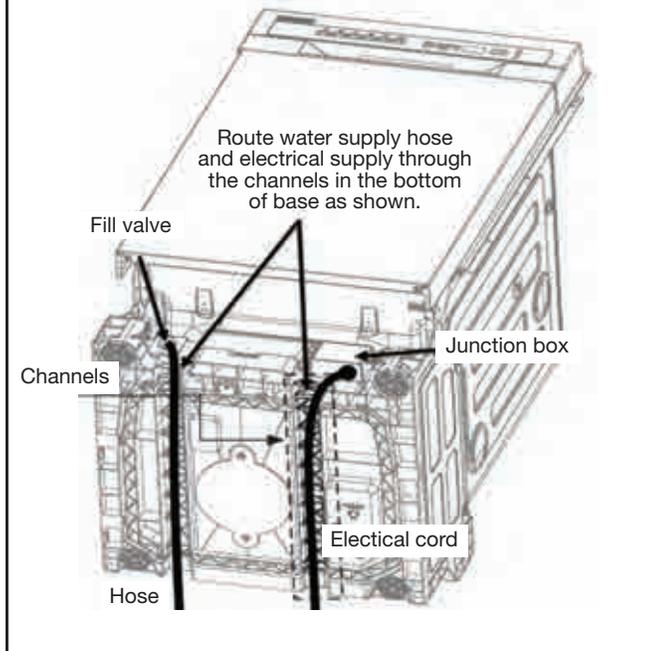

Place wires inside terminal box. Replace the cover by inserting the hooks of the terminal cover into the slots in the floor of the terminal box and sliding the cover tight against the back wall where wires come in. Make sure wires are tucked inside the box and not pinched by the cover.

NOTE: Route power cord out the bottom rear channel provided. Do not plug cord into an outlet until instructed to do so.

UTILITY ROUTING CHANNEL LOCATON

18. Water supply hose, power cord channel routing locations

Route the water supply and electrical supply to the back of the unit through the bottom base channels provided. Secure utilites in channel using tape or wire ties.

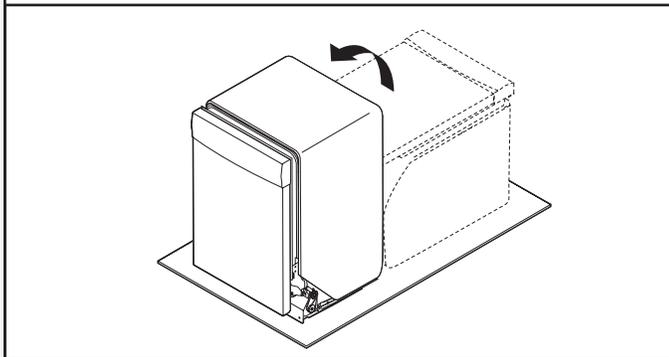

⚠ WARNING

Excessive Weight Hazard

Use two or more people to move and install dishwasher.

Failure to do so can result in back or other injury.

19. Stand dishwasher upright

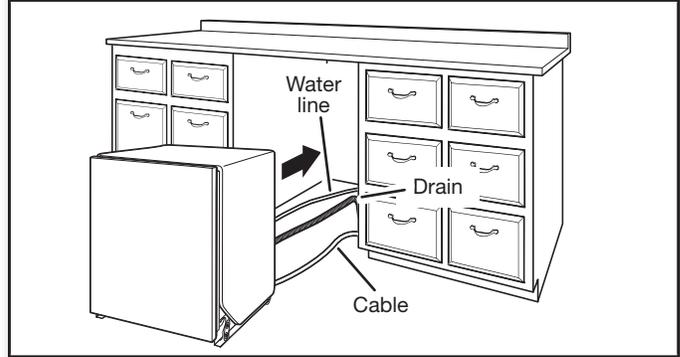

Using two or more people, stand the dishwasher up.

NOTE: Do not install kick plate until instructed to do so.

Dishwasher may fit tightly into cabinet opening. Do not remove insulation blanket—the blanket reduces the sound level.

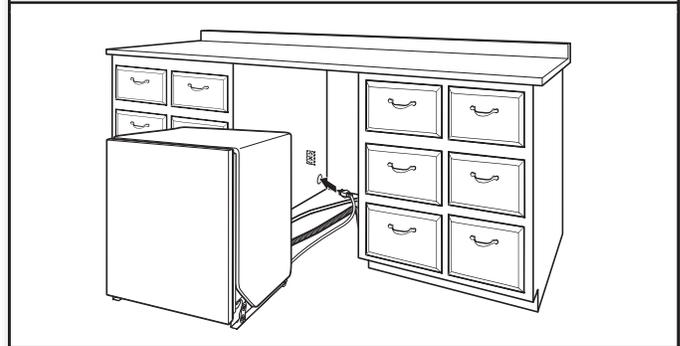

NOTE: Route water supply, drain hose, and power cord out the rear of the dishwasher.

20. Move dishwasher close to cabinet opening

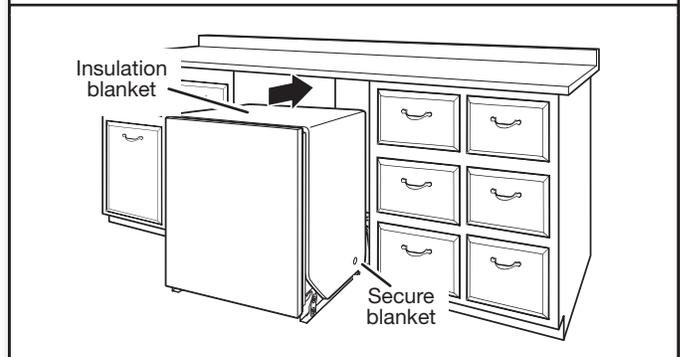

Route the utilities through the holes in the cabinet, and pull the slack out at the same time as the dishwasher is pushed into the cabinet

21. Route power cord

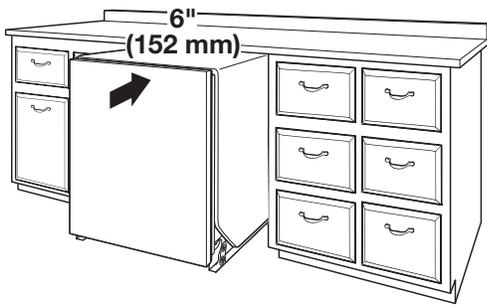

If using a power cord, make sure to route the end through hole in cutout before sliding dishwasher into the cabinet opening.

22. Secure insulation blanket

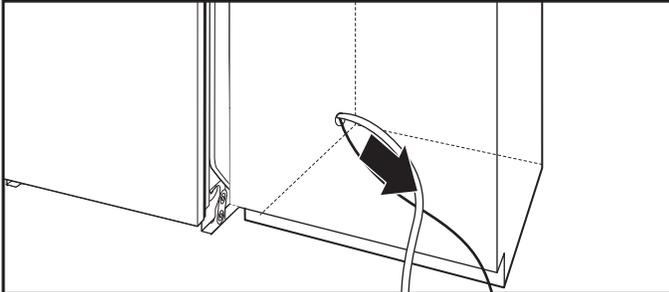

NOTE: Make sure insulation blanket is secured at both left and right rear corners before pushing into cabinet opening to keep the blanket from bunching up in a tight fitting cabinet.

23. Move dishwasher all but 6" (152 mm) into cabinet opening

NOTE: Leave unit about 6" (152 mm) out from cabinet in order to install anchor brackets and adjust door tension if needed.

24. Pull slack from utilities

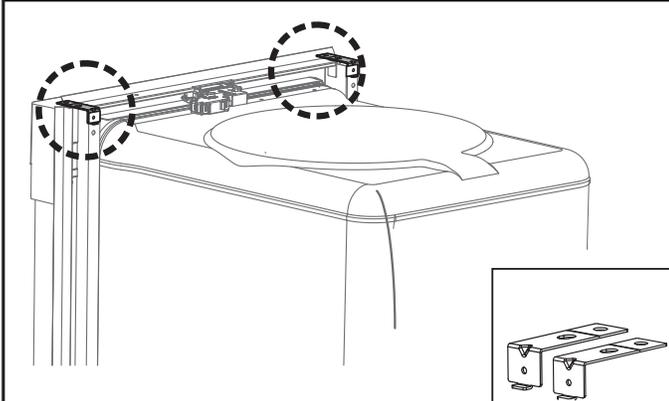

NOTE: Pull slack out of utilities at the same time the dishwasher is pushed into the cabinet opening to avoid any kinks.

CHOOSE ANCHOR ATTACHMENT METHOD

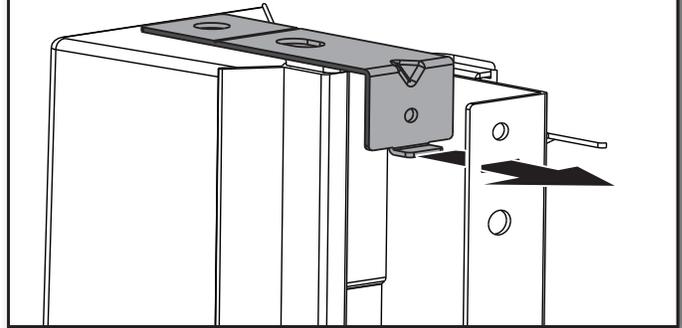

OPTION #1 INSTALL ANCHOR BRACKETS FOR UNDERCOUNTER ATTACHMENT

25. Top anchor brackets

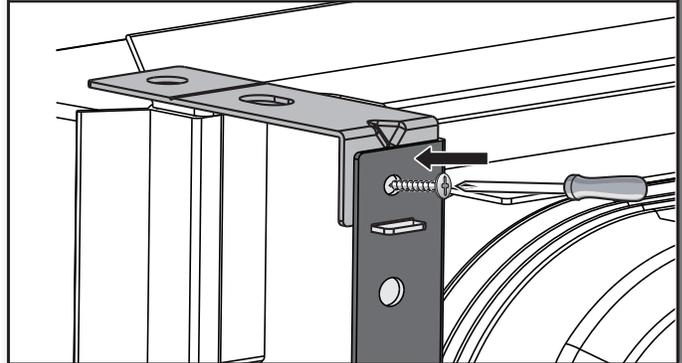

The dishwasher must be secured to the countertop by the two brackets located on top of the dishwasher

26. Install bracket into slots

Install both top brackets into slots on tub collar.

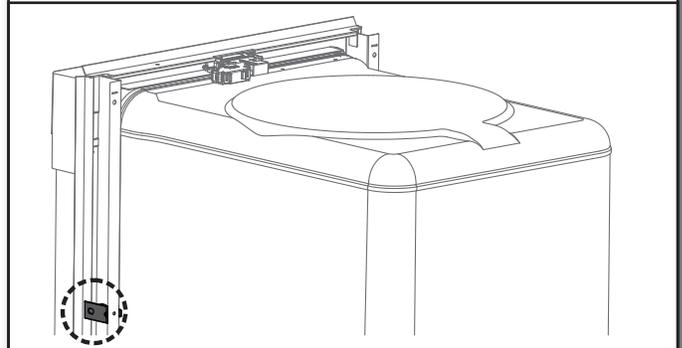

27. Attach bracket screws

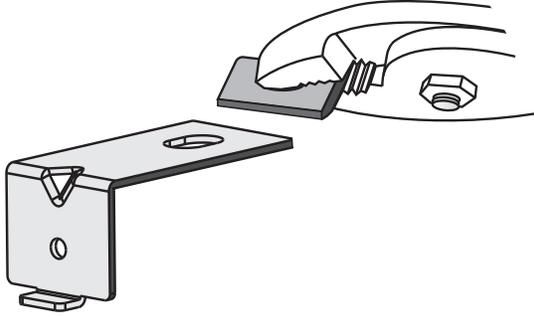

Secure bracket to tub collar with provided screw.

OPTION #2 INSTALL SIDE MOUNTING BRACKETS IF SIDEMOUNTING

28. Side mount bracket location

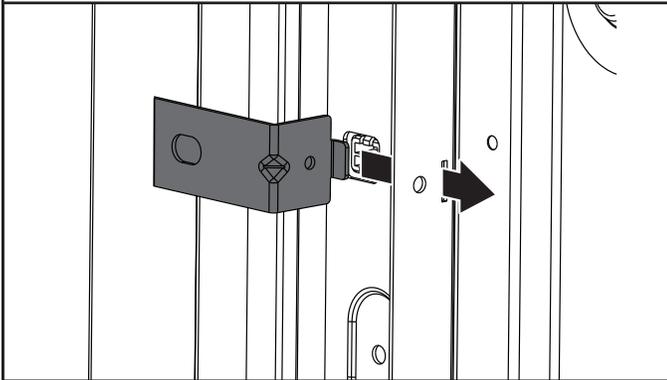

29. Break tab off

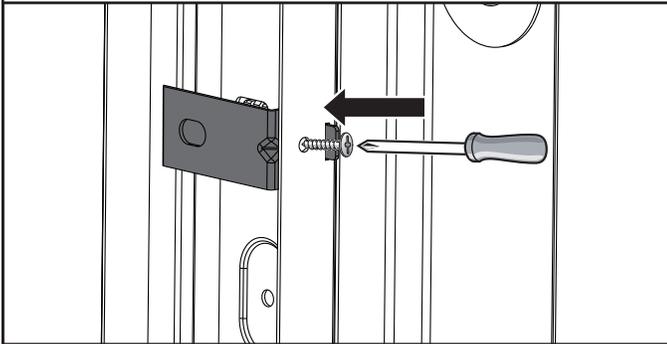

Break tab off at score line for side mounting.

30. Insert bracket into slot

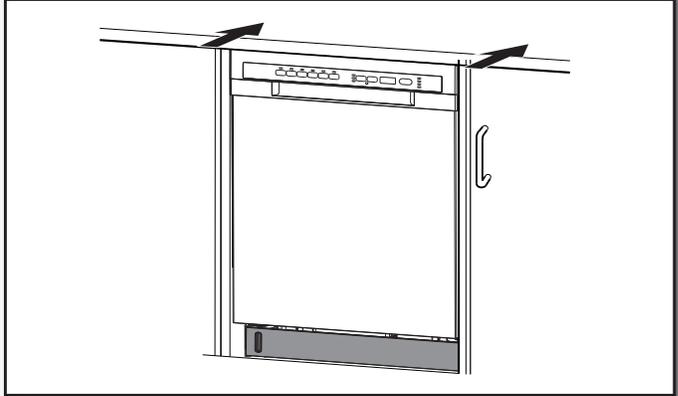

Insert brackets into slot on either side of tub collar.

31. Secure sidemount with screw

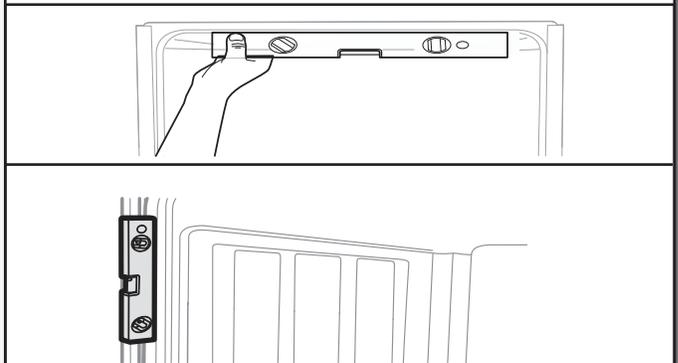

Secure brackets into slot with provided screws.

32. Slide completely into cut out

With top or side mount anchors attached, slide unit into cut out until flush with cabinets.

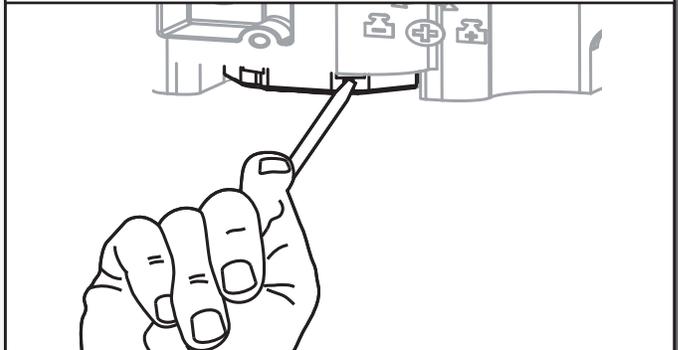

33. Level front to back side to side

Using a level, adjust legs if needed.

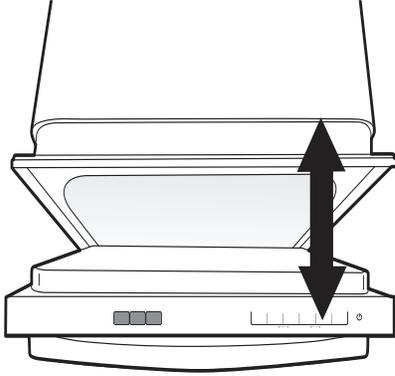

Use a level to check if the dishwasher is level front to back. If the dishwasher is not level front to back, adjust the height of the rear leg until the dishwasher is level. Open the door of the dishwasher and check that both the tub and door clearances are correct. If not, rotate the leveling legs on the bottom front of the dishwasher. You can also check this by placing a level against an inside front vertical surface of the tub.

34. Leveling Leg adjustment

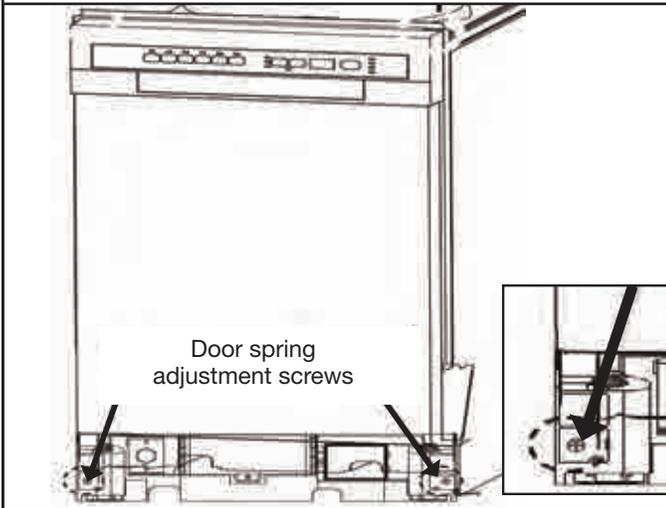

Turn leg counter clockwise to raise the dishwasher or clockwise to lower the dishwasher.

35. Open and close door

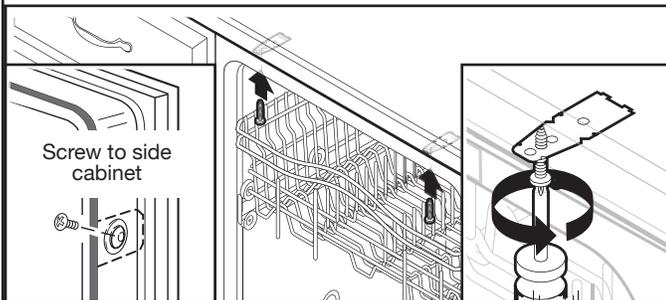

Open and close the door to check spring tension of door.

36. Adjust door spring tension

If needed adjust spring tension by using a Phillips-head screw driver. Turn screws clockwise to increase tension or counter clockwise to decrease door tension.

37. Secure dishwasher

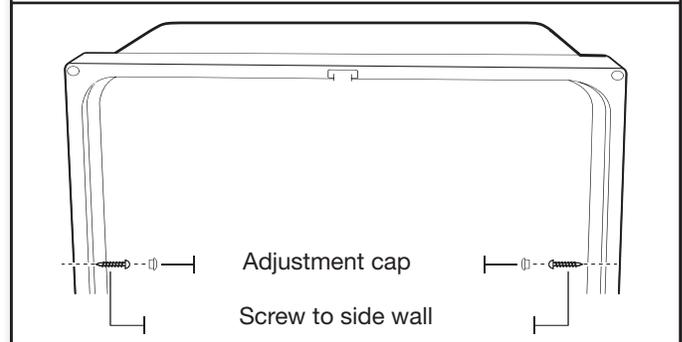

Open dishwasher door to prepare for securing the dishwasher to the countertop or side cabinet.

NOTES:

- The dishwasher must be secured to keep it from shifting when the door is opened or closed.
- Do not drop screws into bottom of dishwasher.
- Locate brackets installed in the “Choose Anchor Attachment Method” section, either on top or on the sides of the dishwasher.

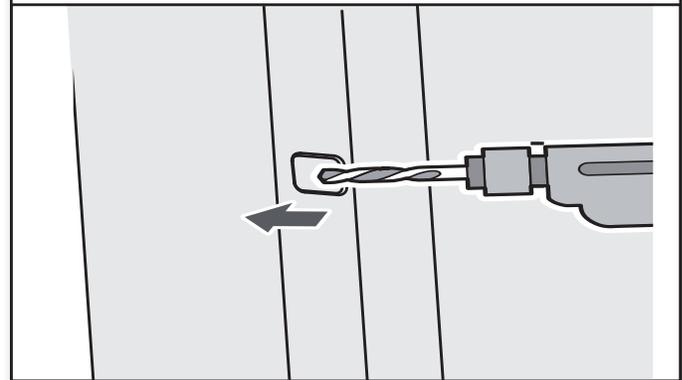

- If countertop anchoring: Secure dishwasher to the countertop with two Phillips-head screws (included).
- If side anchoring: Drill pilot holes in cabinet to avoid splitting the wood. Secure dishwasher to cabinet with two Phillips-head screws (included). Remove upper rack for easier access. See the User Guide for instructions on how to remove the upper rack if needed.

38. Sidemount attachment method

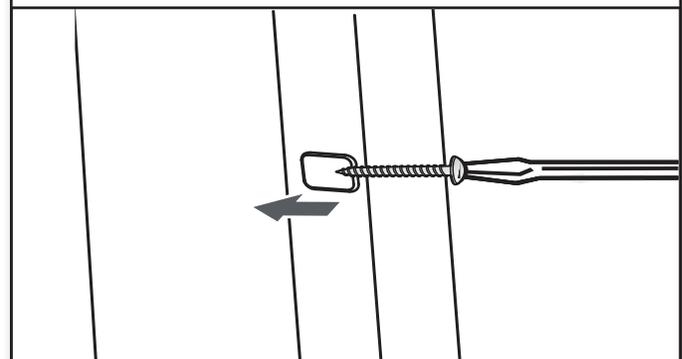

Remove plastic caps covering screw holes on either side.

39. Drill pilot holes

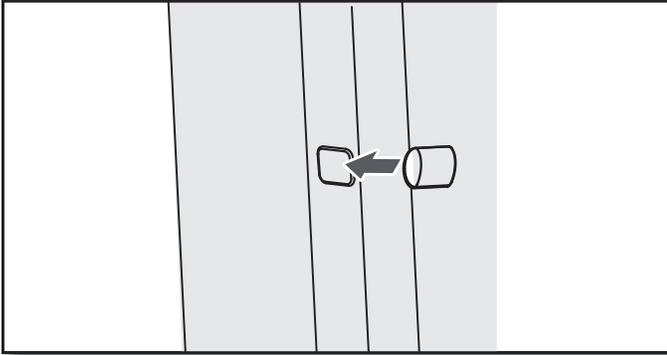

If side anchoring: Drill pilot holes in cabinet to avoid splitting wood.

40. Install screws

Secure dishwasher to cabinet with two Phillips-head screws (included). Remove upper rack for easier access. See the User Guide for instructions how to remove the upper rack if needed.

41. Reinstall plastic caps

Reinstall plastic caps to cover screw heads.

DIRECT WIRE ELECTRICAL CONNECTION

⚠ WARNING

Electrical Shock Hazard

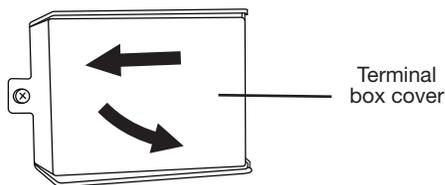

Electrically ground dishwasher.

Connect ground wire to green ground connector in terminal box.

Do not use an extension cord.

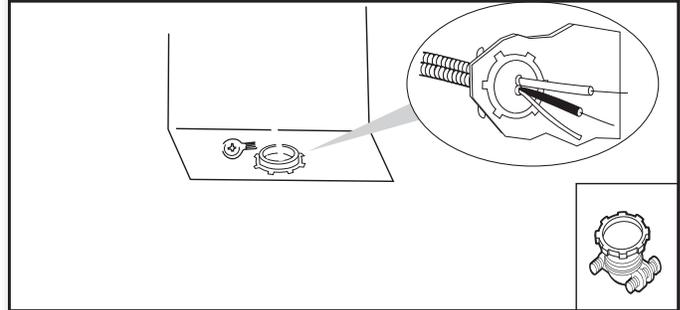

Failure to follow these instructions can result in death, fire, or electrical shock.

42. Remove terminal box cover

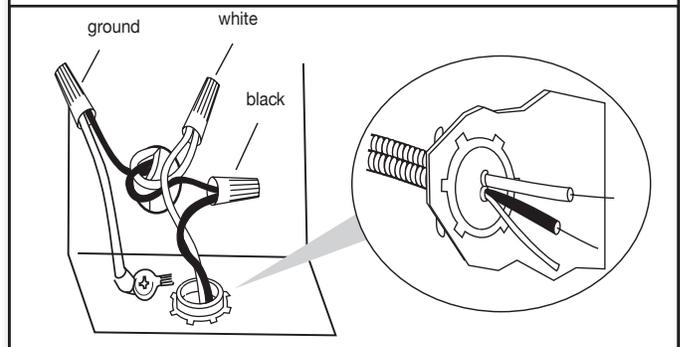

Remove the screw holding the terminal box cover. Remove the cover by sliding it up and lifting its hooks out of the slot. Retain cover for later use.

43. Install strain relief

Install a UL Listed/CSA Approved metallic strain relief. Make sure screw heads are facing up when tightening conduit nut. Strain relief is provided with the power cord kit. See the “Tools and Parts” section for part details and ordering information.

44. Direct Wire—Route cable into terminal box

Select UL Listed/CSA Approved twist-on wire connectors of the proper size. See the “Tools and Parts” section at the front of the guide for part details. Connect wires, black-to-black and white-to-white, using the twist-on wire connectors.

NOTE: Do not pre-twist stranded wire. Twist on the wire connector. Gently tug on wires to be sure both are secured. Route cable so that it does not touch dishwasher motor or lower part of dishwasher tub. Pull cable through UL Listed/CSA Approved strain relief in terminal box.

NOTE: A maximum of two field wiring supply conductors (12 AWG largest size) plus one grounding conductor are permitted in the terminal box.

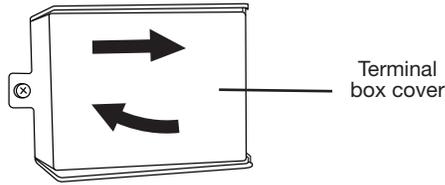

Form bare ground wire into a U-shaped hook. Wrap ground wire hook clockwise around the ground connector screw on the raised floor inside the box and under the washer. Securely tighten ground connector.

Tighten strain relief screws to secure cable. Make sure screw heads are facing up when tightening conduit nut.

Wiring configuration

| | | |
|--------------------|----|--------------------|
| Power supply wire: | | Terminal box wire: |
| white | ←→ | white |
| black | ←→ | black |
| ground wire | ←→ | ground connector |

45. Power cord—reinstall terminal box cover and wires

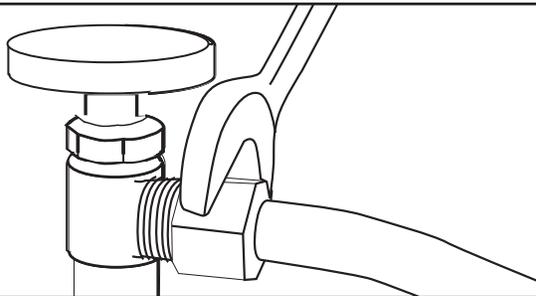

Place wires inside terminal box. Replace the cover by inserting the hooks of the terminal cover into the slots in the floor of the terminal box and sliding the cover tight against the back wall where wires come in. Make sure wires are tucked inside the box and not pinched by the cover.

CONNECT WATER LINE TO HOUSE SHUT-OFF VALVE

NOTE: If using a flexible braided hose, replace inlet hose after 5 years to reduce the risk of hose failure. Record hose installation or replacement dates on the hose for future reference.

46. Attach water supply line

Attach the water supply line (copper tubing or flexible braided line) to the hot water line using a connection configuration that is in compliance with local codes and ordinances. The water supply to the dishwasher should have a manual shut-off valve located under the sink.

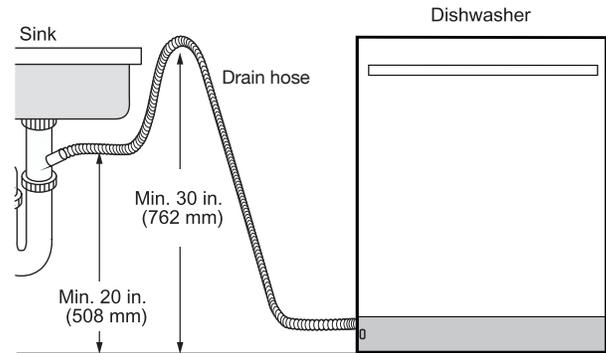

CONNECT DRAIN HOSE

47. Connect drain hose

Connect drain hose to waste tee or waste disposer using one of the following options:

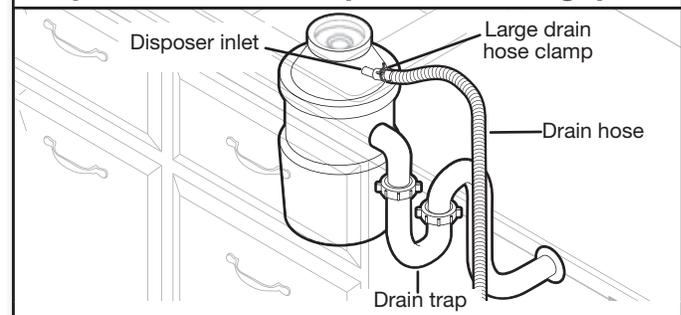

- Option A: Waste disposer – no air gap
- Option B: No waste disposer – no air gap
- Option C: Waste disposer – with air gap
- Option D: No waste disposer – with air gap

Helpful Tip: To reduce vibration of the hose, keep the hose away from the floor.

IMPORTANT: The drain hose connection to the disposer or a waste tee must be made before the drain trap and at least 20" (508 mm) above the floor where the dishwasher will be installed. The drain hoses needs to be secured min of 30" off the floor and fastened to cabinet or underside of the counter top.

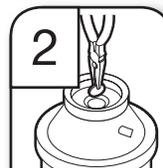

Option A: Waste disposer—no air gap

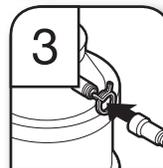

Helpful Tip: Remove disposer knockout plug.

1. Using a hammer and screwdriver, knock plug into disposer.

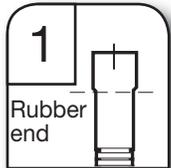

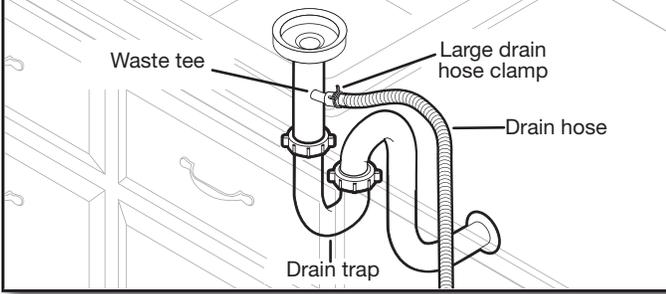

2. Use needle-nose pliers to remove plug.

3. Attach drain hose to disposer inlet with large 1" to 1½" drain hose clamp (not provided).

Option B: No Waste disposer—no air gap

1. Fit rubber end of drain hose to waste tee.

2. Attach rubber end of drain hose to waste tee with a hose clamp. Use a 1" to 1½" (25 to 38 mm) screw-type clamp (not provided).

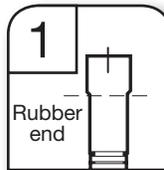

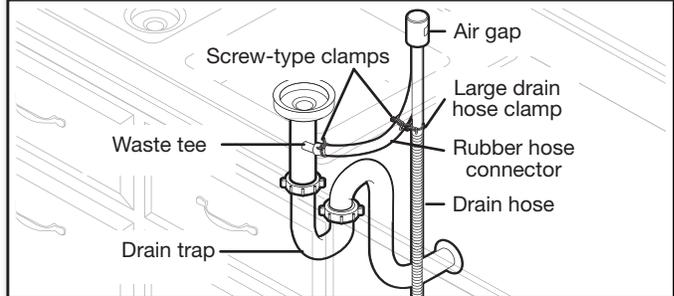

4. Attach rubber end of drain hose to air gap with a hose clamp. Use a 1" to 1½" (25 to 38 mm) screw-type clamp (not provided).

5. Use a rubber hose (not provided) with screw-type clamps to connect from air gap to disposer inlet.

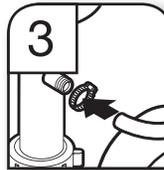

Option D: No waste disposer – with air gap

1. Connect rubber end of drain hose to air gap.

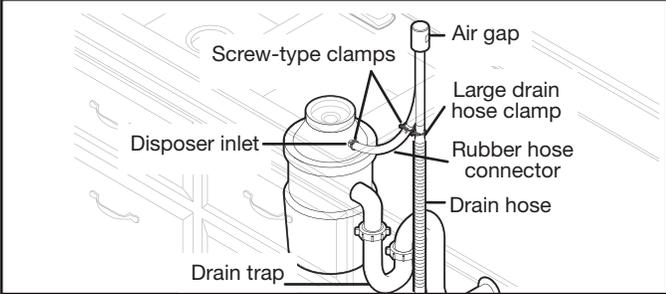

2. Attach drain hose to air gap. Use a 1" to 1½" (25 to 38 mm) screw-type clamp.

3. Use a rubber hose (not provided) with screw-type clamps (not provided) to connect from waste tee to air gap.

Option C: Waste disposer – with air gap

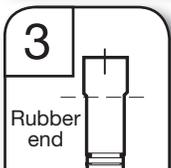

Helpful Tip: Remove disposer knockout plug.

1. Using a hammer and screwdriver, knock plug into disposer.

2. Use needle-nose pliers to remove plug.

3. Connect rubber end of drain hose to air gap.

COMPLETE INSTALLATION

Check that the power supply wire or cord does not touch dishwasher motor or the lower part of the dishwasher tub.

⚠ WARNING

Electrical Shock Hazard

Plug into a grounded 3 prong outlet.

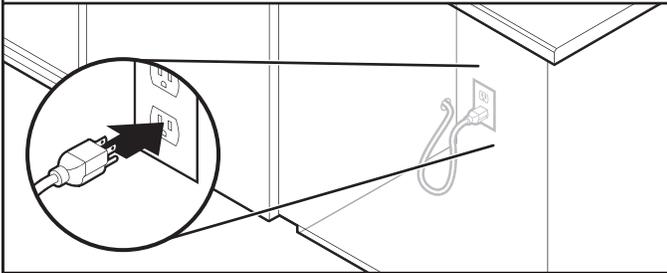

Do not remove ground prong.

Do not use an adapter.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

48. Power supply cord—Plug into a grounded 3 prong outlet

Plug into a grounded 3 prong outlet.

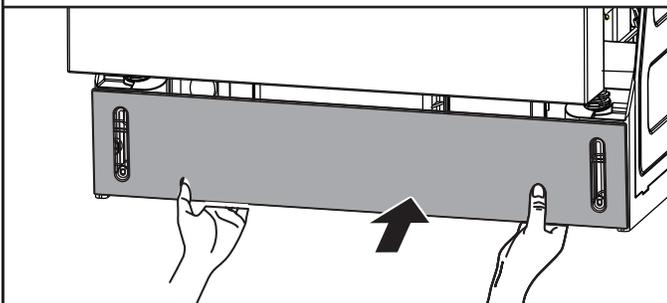

49. Reconnect power

Reconnect electrical power at the fuse box or circuit breaker box.

NOTE: With the access panel off, start the dishwasher and allow it to complete the shortest wash cycle. After the first 2 minutes, unlatch door, wait 5 seconds, then open door. Check that there is water in the bottom of the dishwasher tub. Check that dishwasher is working properly.

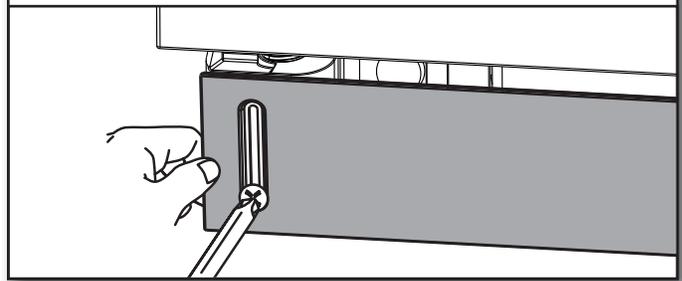

REINSTALL ACCESS PANEL

50. Reinstall panel

Place the panel against dishwasher legs. Using a Phillips screwdriver or 1/4" nut driver, reinstall the screws through the holes in the access panel.

51. Secure with screws

Check that the lower edge of the access panel touches the floor. Adjust if necessary.

Tighten access panel screws.

CHECK OPERATION

- Read the dishwasher User Guide that came with your dishwasher.
- Check that all parts have been installed and no steps were skipped. Check that you have used all tools.

If the dishwasher is not working properly, disconnect power or unplug dishwasher and refer to the "If Dishwasher Does Not Operate" section.

IF DISHWASHER DOES NOT OPERATE

First try the solutions suggested here to possibly avoid the cost of a service call.

- Has the circuit breaker tripped or the house fuse blown?
- Is the door closed tightly and latched?
- Has the cycle been set correctly to start the dishwasher?
- Is the water turned on?

If none of these possible solutions work, please see the User Guide for service contact information.

ADDITIONAL TIPS

Expect longer wash times. Your new dishwasher will average 2-5 hours per load but use nearly 40% less energy than older models. Designed with a low wattage, low energy consumption motor, your dishwasher washes longer to ensure exceptional cleaning. Certain models are equipped with an optical water sensor, so the first cycle will run longer to calibrate to the optical sensor. Selecting certain options could increase cycle time past 3.5 hours.

Rinse aid is necessary for good drying results. This dishwasher is designed to be used with rinse aid for good drying performance and controlling hard water deposit buildup. Energy efficient dishwashers use less water and energy, so they depend on the water sheeting action of rinse aid for good drying performance.
